

# “What Can Digital Retouching Do For Me?”

©2004 Moi Design Studio, All Rights Reserved.

Even though your MOI photos look good you still might want to consider some enhancements or cleanup of your images. We strive to maintain the integrity of your look and natural appearance as we remember you in the flesh. Lighting, light temperature, digital cameras, and telephoto lenses, can embellish beauty as well as flaws. Following are some examples of enhancements that can be applied to your photos which allow some of your “inner beauty” to shine through! We consider the following examples as minor retouching but we can also do major retouching, which would involve digital plastic surgery for things such as removing double chins, lipo-suction, and enlarging or shrinking of various parts of the anatomy. We can also digitally remove wrinkles from clothing, but our suggestion is to iron your clothes before your photo shoot, or for a small fee, moi can iron them for you!

<p><b>Receding Hair Line?</b> If you're not comfortable with your hair line, we can muster up some digital miracle-grow to give your locks the natural youthful appearance they once had. For a professional looking job, this treatment takes a minimum of 30 minutes and is perfectly painless!</p>			<p><b>Need hair color?</b> If you didn't have time to go to the hair salon prior to your photo shoot, Moi can digitally apply a color rinse to enhance your locks, totally change the color, or just touch up your roots. We will also make your eyebrows match your new look, as well as color balance your skin for the most attractive combination.</p>
<p><b>Fly-Away Hairs?</b> We can activate our digital hair spray and tame those wild hairs to give you and your publicity shot a neater appearance.</p>			<p><b>Discolored or Speckled Teeth?</b> The Digital Dentist clears up calcium deposit speckles and brightens teeth in about 5 minutes. If you have chapped lips or broken vessels on your lips add another 5 minutes for the total transformation into a luscious set of lips and a vibrant smile!</p>

<p><b><i>Droopy lids, eye shadow, and eye color?</i></b> Moi can push a droopy lid back into shape, apply colored eye shadow (figure b), and even give you a different eye color (figure c).</p>	
<p><b><i>Eye Enhancement?</i></b> Eyes are the windows to the soul. Whether you have allergies or have been out partying, bloodshot eyes usually are not what you want as a reflection of your “soul” in a publicity shot! (figure a) We can not only digitally “Visine” your eyes, but we can also enhance the color and clarity of your eyes. We can apply digital eye liner, mascara, and eye shadow —no need to hire a make up artist—we can do it better, digitally! We can soften sun damage, crows feet, and puffy bags around the eyes and painlessly digi-wax and reshape your brow line. We can eliminate extra catch lights and overall make you look like you’ve spent a relaxing week at a beauty spa (figure b) or we can turn back the clock a few or so years!(figure c) And no one will ever know it’s retouched! For a professional looking job, this total treatment takes a minimum of 15 minutes for each eye!</p>	

	<p><b><i>Forgot your favorite lip stick?</i></b> No Problem, we can create several hues and intensities of lip color... even “hulk” green!</p>
	<p><b><i>Large pores, blemishes and scars?</i></b> If you have any of these problems, Moi can reduce the pores, zap the zits and tone your skin to look silky smooth, still revealing natural beauty marks or freckles! This treatment varies according to damage. Anywhere from 10 minutes to 30 minutes for the face area.</p>
	<p><b><i>Spider Veins, Spots, &amp; Shine?</i></b> We can tone down the spots, veins and shine on your nose. If your nose is a little redder than the rest of your face we can color balance it to match the rest of your face. We can even trim your nose hairs! This enhancement takes about 15 minutes.</p>
